

Outside Plant Services

FARR Technologies provides complete OSP services including:

- Design
- Route Selection
- Detailed Field Engineering
- Mapping
- Contract Preparation
- Project Management
- Construction Management
- Right of Way
- Permitting
- Acceptance Testing
- Closeouts

FARR Technologies provides the latest techniques for construction projects utilizing:

- GPS data
- GIS Mapping
- LiDAR modeling
- Field Notes

This approach allows substantial savings for clients when preparing information for contracts because staking can be completed faster with a substantial decrease in field work. Map Conversion services are also available due to our extensive experience with AutoCAD technologies. FARR Technologies provides on-site management during construction and provides OSP inventory services to its clients.
